

Curriculum Vitae

Cian Wilson

cwilson@carnegiescience.edu

Education & Academic Experience

2016-present Computational Scientist

Department of Terrestrial Magnetism, Carnegie Institution for Science, Washington, DC

Responsible for managing the department's scientific computing laboratory, maintaining and developing software for high performance computing with a focus on fluid dynamics.

2014-2016 Associate Research Scientist

2011-2013 Post-doctoral Research Scientist

Fluid Migration in Deformable Porous Media

Lamont-Doherty Earth Observatory, Columbia University, New York

- Numerics:
- Principal developer TerraFERMA:
 - a Transparent Finite Element Rapid Model Assembler for solid Earth problems
 - based on open-source numerical libraries FEniCS, PETSc and SPuD
 - provides framework for composing and exploring nonlinear multi-physics problems
- Applications:
- Fluid migration at plate boundaries
 - Mantle dynamics
 - Reactive cracking

2009-2010 Post-doctoral Research Associate

Modeling Multi-Material Compressible Flows on Unstructured Adaptive Meshes

Institute of Shock Physics, Imperial College London

- Numerics:
- Semi-implicit compressible pressure projection using linearized equations of state
- Applications:
- Landslide generation of tsunami
 - Mantle convection modeling with adaptive meshes

2005-2009 PhD Computational Physics

Modeling Multiple-Material Flows on Adaptive Unstructured Meshes

Department of Earth Science & Engineering, Imperial College London

Principal supervisors: Dr Gareth Collins, Professor Chris Pain, Dr Matthew Piggott

- Numerics:
- Developed coupled & minimally dissipative flux-limiters for material advection

- Applications:
- Validation of a landslide-generated tsunami model

- Awards:
- EPSRC Departmental Scholarship and CASE Award (AWE)

2004-2005 MSc Mathematical Modeling & Scientific Computing

Computing Laboratory & Mathematical Institute, University of Oxford

- Dissertation:
- Elliptic Structured Grid Generators Using Unstructured Triangulations
 - Supervised by Dr Chris Farmer
 - Demonstrated elliptic finite element mesh generator suitable for concave domains
- Awards:
- EPSRC Scholarship

2000-2004 MSc Earth Sciences (first class)

Department of Earth Sciences, University of Oxford

- Dissertation:
- Long Wavelength Gravity & Topography Anomalies in the Central Pacific
 - Supervised by Professor Tony Watts
 - Periodogram and multi-taper analysis of gravity coherence and admittance
- Awards:
- University Scholarship
 - Gibb's Prize, Best Independent Mapping Project

Relevant Activities & Experience

- Principal developer TerraFERMA, <http://terraferma.github.io>
- Core developer Fluidity, <http://fluidityproject.github.io>
- Developer SPuD, <http://tinyurl.com/hhlgylg>
