LIVE MUSIC

Bring the whole family!

At EPL, researchers study the universe, from the rocks beneath our feet to the planets and stars above. We're working to unlock the secrets of earthquakes, volcanoes, meteorites, and even the origins of life on Earth.

On October 24, 2026, we invite you to see for yourself!

- Build your own spectrometer and see light in a whole new way.
- Erupt the "trashcano" and explore the power of Earth's interior.
- Touch a rock from space.

The EPL Open House is free, family-friendly, and full of surprises. Your ticket to science is waiting!

5241 Broad Branch Rd NW, Washington, DC 20015
